

Xilo- tree protection

This data sheet is not a contractual reference document.
The stated average values are based on internal tests.

The dimensions of the Xilo-tree protection upon delivery and after it has been rolled up are as follows:

Article	Size upon delivery	Diameter (rolled up)
Art-Nr. WB7 Xilo-tree protection Viticulture 7-fach	600 x 485 mm (length x width)	154 mm
Art-Nr. XB7 Xilo- tree protection 7-fach	1200 x 485 mm (length x width)	154 mm
Art-Nr. XB9 Xilo- tree protection 9-fach	1200 x 655 mm (length x width)	208 mm
Art-Nr. XB11 Xilo- tree protection 11-fach	1200 x 785 mm (length x width)	250 mm

Materials	
Wood species veneer	Poplar robusta
Wire corrugated /clip	Ungalvanized; 0,9 mm

Calculated service life (depending on environmental conditions)	
Xilo- tree protection	3 – 7 years
Wire corrugated /clip	~ 6 years

Note:

Wood is a natural product!

Individual veneers may deform differently. These deformations are reduced by the technical design but not completely prevented.

For deciduous trees, lateral growth may occur outside the Xilo tree protection. The shoots can be manually pulled back inside during maintenance. The larger radius makes this task easier and simultaneously reduces the risk of lateral growth.
