

Xilo-Baumschutz

This data sheet is not a contractual reference document.
The stated average values are based on internal tests.

The Xilo-Baumschutz, depending on the model, has the following dimensions upon delivery: 1200 mm x 700 mm, 1200 mm x 860 mm, or 1200 mm x 460 mm. When rolled, it achieves a diameter of approximately 223 mm, 274 mm, or 120 mm.

Materials	
Wood species veneer	Beech or other European woods
Wood species tension veneer	Beech or other European woods
Wire	Ungalvanized; 0,8 mm
Clip	Metal clips (lightly galvanized)

calculated service life (depending on environmental conditions)	
Xilo-Baumschutz	3-7 years
Wire	8,75-10 years
Wire turned	5,25-6 years

Note:

Wood is a natural product!

Individual veneers may deform differently. These deformations are reduced by the technical design, but not completely prevented.

For deciduous trees, lateral growth may occur outside the Xilo tree protection. The shoots can be manually pulled back inside during maintenance. The larger radius makes this task easier and simultaneously reduces the risk of lateral growth.
